Skills

Python

JavaScript

HTML & CSS

React

React Native

MySQL

SQL

Ruby

Ruby on Rails

MongoDB

Node.js

jQuery

Bootstrap

Git

Heroku

Profile

Passionate, ambitious, and dedicated individual who made a career change in order to pursue passion in Software Engineering. Recent graduate of a software engineering immersive boot camp, where work was six days a week and fourteen hour days. Hard worker with the ability to adapt and overcome difficult situations. Passion for learning new languages and diving deep into languages already known, while creating projects on down time to improve overall skills. Well rounded individual in oral communication and experience with working in groups. Obsessed with trying to understand the customers needs and ease of use when creating a project. and a focus on long-term thinking

Projects

Storefront Project

Second project completed at General Assembly using JavaScript, Mongoose, Express, Node, jQuery and Bootstrap. First time using bootstrap and incorporating jQuery into any project. Gaming with friends is quite fun, so combining an e-commerce store with online gaming was quite fun

Yelp Project

First group project completed at General Assembly using JavaScript, MERN stack with another developer. Created the styling for this project, using CSS and JavaScript. Worked with developer creating the back end and password verification.

Todo Project

Worked with two other developers at General Assembly using JavaScript, Ruby and React. Ended up creating the styling, front end, and half of the back end. One developer decided not to participate and the other was having technical issues on his end. An interesting and fun experience.

WaterCooler Project

Worked with three developers and a User Experience team using a MERN stack. First time working with a UX team. We decided on an alert app, but were unable to complete the programming in time. We changed the app to a glorified to do app. The UX team took approximately a week to complete the design using Figma. Finished the project two weeks after given the Figma design. Wonderful experience working with a design team.

Portfolio

Created portfolio using CSS, HTML, JavaScript and SASS. Heroku does not allow projects that use only those three languages. Had to trick Heroku in thinking the project was written in PHP.

Education

Software Engineer, General Assembly, Online

NOVEMBER 2020 – FEBRUARY 2021

Attended a Software Engineer immersive course from November 2020 until February 2021. Fantastic experience that jump started my career in web development and computer programming. Work was intense, six days a week and sixteen hours days. Enjoyed working long days programming with classmates.

AA Communications, West Valley College

AUGUST 2001 – MAY 2004

Hobbies

Ceramics, Cycling, SpaceX,
Gaming, Board Games,
Car Enthusiast, Programming,
Creating a kids learning app with
React Native

Courses

Software Engineer Immersive, General Assembly

NOVEMBER 2020 – FEBRUARY 2021

POST, Santa Clara County

MARCH 2019 – NOVEMBER 2019

Employment History
